Tagliare opzionalmente il profilo lineare alla misura desiderata mediante taglio laser (procedura raccomandata) oppure con una sega circolare per profili di metallo. A taglio avvenuto, rettificare in accorciamento le estremità dei conduttori in rame interni al profilo con una tenaglia.

If needed, cut the linear profile to the desired length through laser cutting (recommended operation) or alternatively with a circular saw designed for metal profiles. After the cut is made, rectify and shorten the outer ends of the copper conductors inside the profile with pincers.

Suspended **Ceiling Mounted** **Recessed**

If the 0/1-10V dimming version of wall washer module is used in the track, please make sure the side of the negative pole of the track and the same track group (if it connects with other tracks together) toward the wall.
